

Allyson Jones

Background

Dr. Jones is a Professor in the Department of Physical Therapy with a cross appointment in the Department of Public Health Sciences. She has a PhD in Epidemiology and a MSc in Physical Therapy from the University of Alberta, a BA in Administrative Studies from the University of Winnipeg and a BSc in Physical Therapy from the University of Saskatchewan.

Prior to joining the Department of Physical Therapy at the University of Alberta, Dr. Jones completed a Canadian Institutes of Health Research (CIHR)/Alberta Heritage Foundation for Medical Research (AHFMR) Postdoctoral Fellowship in health-related quality of life. She received a New Investigator Award from the American Geriatrics Society for her postdoctoral work. Dr. Jones is a CIHR New Investigator (2006-2011) and AHFMR Population Health Investigator (2007-2014).

Current Research

Her research interests are patient health outcomes and health-related quality of life in chronic musculoskeletal conditions common in elderly patient populations. Using multiple methods, including patient surveys, clinical evaluation, performance measures, and administrative databases, Dr. Jones looks at functional, health-related quality of life (HRQL), and health services outcomes to determine how we can maximize successful outcomes with total joint arthroplasty/arthritis, and hip fracture.
