

Nick Bansback

Assistant Professor, School of Population and Public Health, University of British Columbia
Scientist, Arthritis Research Canada

Nick Bansback is an Assistant Professor at the School of Population and Public Health, University of British Columbia, and a Scientist at Arthritis Research Canada. A CIHR New Investigator, Dr. Bansback's research is focused on using health economics and

decision science to better inform policies and practices in health. This predominantly revolves around determining value – from the perspective of patients in terms of what aspects of health and treatments are most important to them, and from the perspective of policy-makers in terms of delivering the most health benefits with limited resources.
